## eTrike

Electric assist all terrain wheelchair has can be driven in x3 different ways

- Manually by pushing the drive levers allowing the rider to have clean, dry hands whatever the weather.
- Power assist by using the twist throttle or thumb throttle.
- Hybrid by pushing drive levers and twisting throttle simultaneously.

The all terrain wheelchair allows you the ability to combine manual power with electric assist as and when you want. The distance range will depend on conditions, user weight, speed and terrain, but as a rough guide between 8 and 20 miles.
